## Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-23 and 29-44, drawn to providing jackpot winning, classified in class 463, subclass 26.
- II. Claims 45-46, drawn to testing a jackpot system, classified in class 463, subclass 29.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions Groups I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination Group I does not requires a specific method of testing a jackpot system of the subcombination of Group II. The subcombination has separate utility such as checking condition of a game machine.
- 3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Application/Control Number: 10/782,590 Page 3

Art Unit: 3713

4. Should applicant elects the subcombination Group II, applicant is further required to elect one of the following species:

Species 1: specification page 14, lines 20-30 and page 15, lines 1-3 (claim 45).

Species 2: specification page 15, lines 5-10 (claim 46).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse.

To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

6. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Kim Nguyen whose telephone number is 571-272-

4441. The examiner can normally be reached on Monday-Thursday during business

hours.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Xuan Thai, can be reached on 571-272-7147. The central official fax

number for the organization where this application or proceeding is assigned is 571-

273-8300.
